

Use-Case Flow Specification

Problem Statement #10 – Student Club Event Ticketing & Budget Portal

SRN: PES1UG24CS083	Class: SE Section B
Project: Student Club Event Ticketing & Budget Portal	Faculty: Dr. Sapna V M

Use Case

UC-01 / UC-02: Submit Event Proposal & Route Budget Approval Workflow

Primary Actor

Club Lead

Secondary Actors

Faculty Coordinator, Finance Office, Dean (approval chain — included via UC-02 Route Budget Approval Workflow)

Preconditions

- Club Lead is authenticated and has an active, verified club profile on the portal.
- The proposed event date does not clash with an already-approved booking for the requested venue.

Postconditions

- Success: Proposal status is “Approved”, a budget allocation is reserved, and QR-code ticket generation (UC-04) is triggered.
- Failure: Proposal status is “Rejected” or “Revision Requested”, and the Club Lead is notified with reviewer comments.

Main Success Scenario

1. Club Lead logs into the portal and selects “New Event Proposal.”
2. System displays a form for event title, date, venue, description, and estimated budget.
3. Club Lead fills in the required details and optionally attaches a sponsorship document.
4. Club Lead submits the proposal (FR-002).
5. System validates that all mandatory fields are complete and the budget is a valid positive number.
6. System sets proposal status to “Submitted” and invokes UC-02: Route Budget Approval Workflow «include».
7. System forwards the proposal to the Faculty Coordinator for first-level review.
8. Faculty Coordinator reviews the proposal and applies a digital sign-off.
9. System forwards the proposal to the Finance Office, which reviews the budget line items and signs off.
10. System forwards the proposal to the Dean for final approval.
11. Dean approves the proposal; system updates status to “Approved” (FR-001) and reserves the budget allocation.
12. System triggers UC-04 (Generate QR-Code Ticket) and notifies the Club Lead of the approval via the dashboard and e-mail.
13. Use case ends successfully.

Alternate Flow — 9a: Budget Rejected by Finance Office

- 9a1. Finance Office rejects the proposal and records comments explaining the concern.
- 9a2. System sets status to “Revision Requested” and invokes UC-08: Request Budget Revision «extend», notifying the Club Lead with the reviewer comments.
- 9a3. Club Lead revises the budget and resubmits within 48 hours; flow resumes at step 5.
- 9a4. If the Club Lead does not resubmit within 48 hours, the system automatically cancels the proposal, sets status to “Rejected,” and notifies the Club Lead. Use case ends in failure.
